Section 4 FIRST AID MEASURES

Skin: Remove contaminated clothing immediately. Wash all exposed areas with soap and

water. Get medical attention if irritation develops. Remove dried cement with

Oatey Plumber's Hand Cleaner or baby oil.

Eyes: If material gets into eyes or if fumes cause irritation, immediately flush eyes

with plenty of water until chemical is removed. If irritation persists, get

medical attention immediately.

Inhalation: If symptoms of exposure develop, remove to fresh air. If breathing becomes

difficult, administer oxygen. Administer artificial respiration if breathing

has stopped. Seek immediate medical attention.

Ingestion: DO NOT INDUCE VOMITING. Rinse mouth with water. Never give anything by mouth to

a person who is unconscious or drowsy. Get immediate medical attention by calling a Poison Control Center, or hospital emergency room. If medical advice cannot be obtained, then take the person and product to the nearest medical

emergency treatment center or hospital.

Section 5 FIRE FIGHTING MEASURES

Flashpoint / 14 - 23 Degrees F. (-10 to -5 Degrees C) / CCCFP

Method:

Flammability: LEL = 1.8 % Volume, UEL = 11.8 % Volume

Media:

Extinguishing Use dry chemical, CO2, or foam to extinguish fire. Cool fire exposed container

with water. Water may be ineffective as an extinguishing agent.

Special Fire Firefighters should wear positive pressure self-contained breathing apparatus Fighting and full protective clothing for fires in areas where chemicals are used or stored

Procedure:

Hazards:

Unusual Fire Extremely flammable liquid. Keep away from heat and all sources of ignition And Explosion including sparks, flames, lighted cigarettes and pilot lights. Containers may rupture or explode in the heat of a fire. Vapors are heavier than air and may travel to a remote ignition source and flash back.

Hazardous Products:

Combustion will produce toxic and irritating vapors including carbon monoxide, Decomposition carbon dioxide and hydrogen chloride.

ACCIDENTAL RELEASE MEASURES Section 6

Procedures:

Spill or Leak Remove all sources of ignition and ventilate area. Stop leak if it can be done without risk. Personnel cleaning up the spill should wear appropriate personal protective equipment, including respirators if vapor concentrations are high. Soak up spill with an inert absorbent such as sand, earth or other noncombusting material. Put absorbent material in covered, labeled metal containers. Prevent liquid from entering watercourses, sewers and natural waterways. Report releases to authorities as required. See Section 13 for disposal information.

Section 7 HANDLING AND STORAGE

Handling: Avoid contact with eyes, skin and clothing. Avoid breathing vapors or mists.

> Use with adequate ventilation (equivalent to outdoors). Wash thoroughly after handling. Do not eat, drink or smoke in the work area. Keep product away from heat, sparks, flames and all other sources of ignition. No smoking in storage

or use areas. Keep containers closed when not in use.

Store in a cool, dry, well-ventilated area away from incompatible materials. Storage:

Keep containers closed when not in use.

Other: "Empty" containers retain product residue and can be hazardous. Follow all MSDS

precautions in handling empty containers. Do not cut or weld on or near empty

or full containers.

Section 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Ventilation: Open doors & windows. Provide ventilation capable of maintaining emissions at

> the point of use below recommended exposure limits. If used in enclosed area, use exhaust fans. Exhaust fans should be explosion-proof or set up in a way that flammable concentrations of solvent vapors are not exposed to electrical

fixtures or hot surfaces.

Respiratory For operations where the exposure limit may be exceeded, a NIOSH approved

Protection: organic vapor respirator or supplied air respirator is recommended. Equipment selection depends on contaminant type and concentration, select in accordance with 29 CFR 1910.134 and good industrial hygiene practice. For firefighting,

use self-contained breathing apparatus.

Skin Rubber gloves are suitable for normal use of the product. For long exposures chemical resistant gloves may be required such as 4H(tm) or Silver Shield(tm) Protection:

to avoid prolonged skin contact.

Safety glasses with side shields or safety goggles. Eye

Protection:

Section 11 TOXICOLOGICAL INFORMATION

Inhalation: Vapors or mists may cause mucous membrane and respiratory irritation,

coughing, headache, dizziness, dullness, nausea, shortness of breath and vomiting. High concentrations may cause central nervous system depression,

narcosis and unconsciousness. May cause kidney, liver and lung damage.

Skin: May cause irritation with redness, itching and pain. Methyl ethyl ketone may

be absorbed through the skin causing effects similar to those listed under

inhalation.

Eye: Vapors may cause irritation. Direct contact may cause irritation with

redness, stinging and tearing of the eyes. May cause eye damage. Swallowing may cause abdominal pain, nausea, vomiting and diarrhea.

Aspiration during swallowing or vomiting can cause chemical pneumonia and

lung damage. May cause kidney and liver damage.
